

LANGUAGE CLASSROOMS WITH INTERNET, AND OTHER PLACES

Students can access their courses from the classroom (requires less bandwidth) and from their own homes that may or may not have the internet or may have a poor internet connection, and also through local WiFi. A highly recommended configuration for implementing course content in large classrooms with many students.

DUAL STUDENTS

Students can use different devices (tablet, mobile, PC, etc.) to access lessons, their notes and evaluations. The content synchronizes chronologically when you connect to the internet.
